

Click & Collect

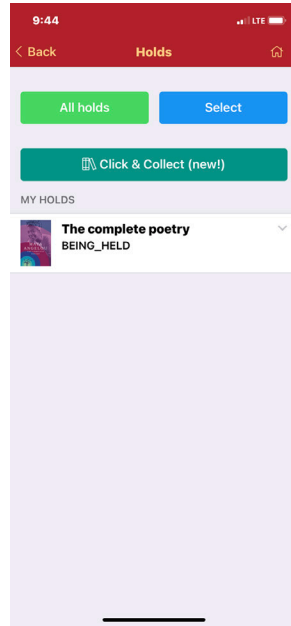

Curbside Service

Introducing Click and Collect Curbside Pickup with the SEO Libraries App.

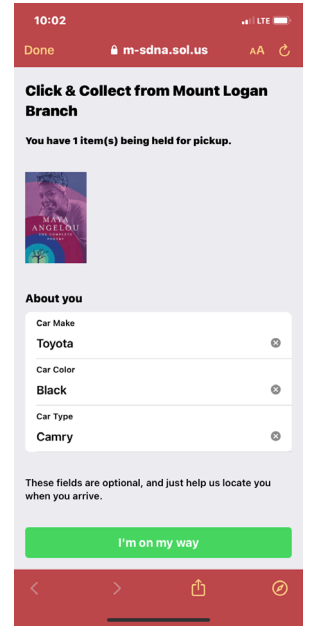

Simple. Intuitive. Just like picking up groceries or your favorite takeout at the curb. Pick up some books and movies and "Stay In to Check Out."

Use the SEO Libraries App (available for Android and iOS in the app store), to search our catalog and place holds for items you'd like to pick up and check out.

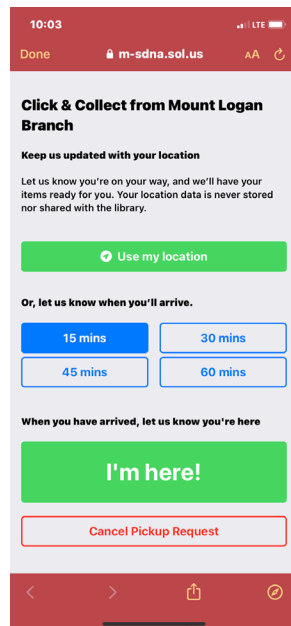

Tell us the make, model, and color of your car, and click "I'm on my way."

This information helps us locate you when you arrive.

We'll notify you when your items are ready. If your holds are available and your library is currently open, you can request to pick up your items at the curb.

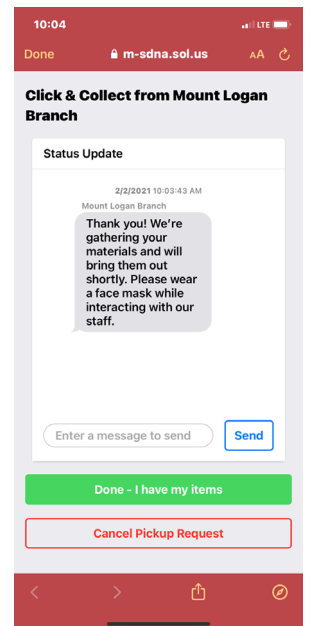

You can give us an estimated time of arrival, or click "Use my location" to let your phone track your trip to the library.

Once you've arrived, you will receive this message. You can communicate with our staff as needed by sending a message back.

Your items will be checked out to your account, and our staff will deliver them to your vehicle.

Please wear a face mask while interacting with our staff.
